DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-5, and 10 drawn to a method of acquiring new customers, classified in class 705, subclass 14.

II. Claims 6-9, drawn to a networked computer apparatus, classified in class 705, subclass 1.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method can be carried out by a materially different apparatus, e.g., one not having an input control unit that receives information from the first and second terminal. That information could be received by manually.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
